1. Overview

As a part of the project several functions of the web application Saucedemo (<https://www.saucedemo.com/>) has been tested. The project has demonstrated automation testing using Playwright from JavaScript and the Page Object Model (POM).

The scope includes testing the following features of the project.

2.1 Inclusions

- Login
- Logout
- Product sorting
- Checkout
- Add to cart
- Website navigation

2.2 Exclusions

- Manual testing
- Database testing
- Performance testing
- Security testing
- API testing
- Load testing

2. Test Environment

- Operating system - Windows 10
- Browsers - Chromium, Firefox, webkit
- Automation framework – Playwright
- Language – Javascript
- Runtime – Nodejs
- Test Design – Page Object Model (POM)

3. Test Approach

The testing has covered several test approaches according to the knowledge level.

- Automation Testing
- Functional Testing
- Positive Testing
- Negative Testing
- Validation testing
- Smoke testing
- UI testing
- Validation testing

4. Defect Reporting Procedure

- A defect/bug is detected when there is a difference between the Expected result and the Actual result.
- After the defect is identified it is documented with the steps to reproduce it and with screenshots.
- Defects are documented in an Excel document.

5. Roles and Responsibilities

Role	Responsibility
Tester	• Create and execute test cases. • Report defects.
Developer	• Fix defects
QA Lead	• Create test plan

6. Test deliverables

- Test plan
- Test Scenarios
- Test cases
- Test execution results
- Bug reports

- Test data
- Automation test scripts
- Page Object Model classes
- Screenshots

7. Entry and Exit Criteria

8.1 Entry criteria

- Test cases are available.
- Website is available for testing.
- Test environment is ready.
- Playwright is installed.
- Features to be tested are identified.

8.1 Exit criteria

- Test cases identified are automated.
- Identified defects are documented.
- Test execution results documented.
